Makati, Metro Manila

February 6, 1989

MEMORANDUM CIRCULAR #88-12:
Salcedo Village Buildings

Please receive herewith copies of street maps of Salcedo Village indicating thereon the details of a revised flow of vehicular traffic in the area.

This new traffic flow plan emphasizes a one-way scheme on most of the roads within the Salcedo Village as well as on streets leading into and out of the Salcedo Village.

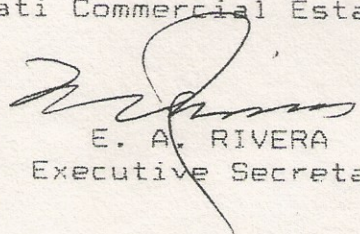

The one-way traffic scheme will be initially effective as of Wednesday, 15 February 1989. A 60-day period for monitoring, evaluation and possible revisions will be observed. It is requested that during such period, observations, recommendations or such other reactions on this traffic scheme coming from your tenants and other building occupants be forwarded in written form to the Association office. All information gathered will be endorsed to the Makati Parking Authority (MAPA) technical staff for collation and consideration for revisions in the scheme where deemed necessary.

Please distribute these street maps to your buildings' tenants/ occupants so the information on this new traffic flow scheme will be given as wide dissemination as possible. With this advance information, it is hoped that any initial confusion will be minimized.

Please give this matter your usually prompt and favorable attention.

Thank you.
