RE : DENGUE AWARENESS

Greetings!

Dengue has been considered by the DOH as an all-year round disease which rises in incidence during the rainy season due to presence of more breeding places for disease-causing **aedes aegypti** type of mosquitoes. This month there is a surge of the Dengue cases in our country, including the National Capital Region (NCR).

In relation to this, we are encouraging everyone to implement regular cleaning and sanitation in your properties and our surroundings to prevent the spread of the disease.

You may also report directly to our office if there are drainage clogging, stagnant or water ponding at our parks and other common areas, kindly send it to macea@macea.com.ph or call 02 7752-79-29, 0917-1111548 for immediate action.

We are hoping for your cooperation.

Sincerely,

PAUL GETTY E. GRANADA
General Manager
