MEMORANDUM CIRCULAR 2017-10

TO: ALL BUILDING ADMINISTRATORS

RE: INSTALLATION OF SAFETY SIGNAGE AT WORK SITES

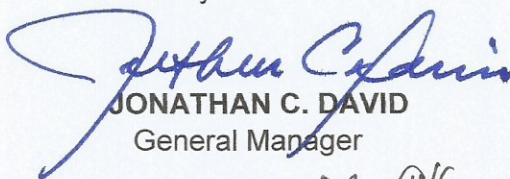

Please be informed that effective immediately all building exterior maintenance and repair works (such as water-proofing, cleaning, repainting of façade, glass replacement, façade repair and the likes) and installation of signage should have the appropriate maintenance/repair works signage installed on the sidewalk, before and after the immediate area of the worksites.

Such signage, 4 ft. by 4 ft. in size, should be placed on the sidewalk during the maintenance/repair activity.

Relative hereto, all work permit requests for the above-subject activities should accompany the signage lay-out/design prior to our processing of the permit document.

In the interest of public safety, the maintenance/repair activities will be disallowed if such signage is not installed at the worksite.

Thank you.

JONATHAN C. DAVID
General Manager
