## **MEMORANDUM CIRCULAR 98-21**

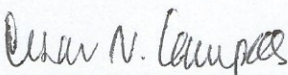

**FOR: MACEA MEMBERS**

**RE: SKYWAY RAMP, AMORSOLO STREET**

---

MACEA has been advised of the government's final decision to pursue the construction of the entry and exit ramps of the Skyway project along the Pasay Road-Amorsolo Street route and that the necessary governmental permits for such construction have been issued for this purpose. In light of the government's decision on the matter, certain members have raised concerns about the effect of these ramps on the traffic along Amorsolo Street and other connecting roads. In response to these concerns, MACEA has retained the services of Ove-Arup & Partners Hongkong Ltd. to study, review and recommend changes, if necessary, in the traffic plans during and after the construction. Citra Metro-Manila Tollway Corp. has agreed to participate and join MACEA in undertaking this study. Based on the results of this study, MACEA will be recommending to the appropriate authorities the measures that will be necessary to address the concerns raised by MACEA members on the effect of these ramps on traffic in the Amorsolo Street area.

We all know the importance of the Skyway system and the need for each of us to help the Government in any way possible to find solutions to many of the problems facing Metro Manila traffic system.
